ANGULAR SLITS

- — DIELINE
- — BLEED AREA
- — SAFETY MARGIN

The diagram illustrates a two-page spread with various margins and areas. A central vertical dashed line separates the left page from the right page. The left page is labeled 'BACK' and the right page is labeled 'FRONT'. A red dashed line represents the outer edge of the pages. A black dashed line represents the inner edge of the pages. A pink dashed line represents the bleed area, which is wider than the black dashed line. A solid pink line represents the safety margin, which is narrower than the pink dashed line. Three diagonal pink lines are drawn in the corners of the pages to indicate the placement of the safety margin and bleed area.

BLEED AREA

The diagram illustrates a page layout with various margins and areas. A central vertical dashed line divides the page into two halves. The left half is labeled 'INSIDE LEFT' and the right half is labeled 'INSIDE RIGHT'. A thick red dashed line outlines the entire page, representing the 'BLEED AREA'. A black dashed line is positioned just inside the red line, representing the 'SAFETY MARGIN'. Two diagonal red lines are drawn in the upper right and lower right corners of the page, indicating the placement of important information that should be kept out of the safety margin area.
